---

**Abstract:** *This research aims to explore the application of Magnetrezeki, a spiritual and practical approach in self-development, with a focus on the aspect of lowering the line of truth (ego) to build critical thinking, strong social leadership, and effective communication. This study uses a qualitative method, by conducting observations both inside and outside the graduate class through discussions and interviews, visual analysis, literature studies, and interviews (individual or group). The results of the study show that by lowering the ego or line of truth, individuals can increase openness in critical thinking, be better prepared to accept different views, and be able to overcome personal biases. This has an impact on leaders' ability to build more inclusive and collaborative social leadership. In the context of social leadership, lowering the ego creates an environment that is more conducive to effective communication, where each member of the group feels valued and actively contributes. Thus, lowering the line of truth has an effect on critical thinking, social leadership, and effective communication skills, especially in social and organizational contexts. It starts with improving the quantum world.*

## Introduction

The background of the writing is that there is still a dichotomy between Islam and *Science*, especially when discussing the Quran. Even though there is no knowledge except religious knowledge, there is no knowledge except that knowledge brings us closer to Allah and heaven. But in reality, religious science is only used in certain situations. It takes the integration of Islam and science that can be practiced daily, 24 hours, even every minute and second. This condition causes the undeveloped Islam in all aspects. Muslims have not yet felt as rahmatan lil alamin. Religious science should exist in politics, technology, economics, national and international law, and issues of gender, human rights, and other environmental and social issues. (Abdullah, 2018)

Figure 1: Amin Abdullah's scientific lab web

The background of the next writing is that there is no clear guide to patience and gratitude in the curriculum. The ummah needs a simple guide that can be practiced daily wherever they are. It can be at home, school, workplace, market, and so on. Another reason is that a certain level of leadership is needed in today's technological era.

**Problem Throttling.** Of the 101 Magnet of Sustenance, the author limits only one magnet of sustenance, namely the Line of Truth, that is, does the practice of the Magnet of Sustenance in lowering the Line of Truth have a significant influence on leadership and increasing the abundance and abundance of sustenance?

**The purpose of the research** is to evaluate the influence of the practice of sustenance magnet on leadership as a form of integration of religion and science.

**Theoretical Research Benefits To** add to the literature on the relationship between spiritual practice and financial well-being and can provide practical guidance for individuals or communities interested in integrating religious and scientific values into daily life.

**The research method** used is a qualitative method, with a way of conducting observations both inside and outside the postgraduate class through discussions and interviews, visual analysis, literature studies, and *interviews* (individual or group).

## Discussion

According to John Maxwell, the five stages of leadership are: Level 1: Position, Level 2: Permit, Level 3: Production, Level 4: Human Resources Development, Level 5: Peak. (Maxwell, 2011) Level 1 is the lowest level of leadership, namely position. Level 2 is based on relationships. The third level of leaders is leaders who have experience, achievements, and credibility in leadership. The fourth level of leadership is that the leader opens wide opportunities for his members to develop into a better one. Fifth-level leadership level Peak or *pinnacle* are leaders who invest their lives in others in a steadfast and sustainable manner; Top leaders help people and their organizations to take advantage of opportunities that others are unaware of; Top leaders can transcend their positions, organizations, and sometimes industries; Top leaders create a legacy in what they do; People follow top leaders because of who they are and what they represent; The top leader gained a positive reputation. (Maxwell, 2011).

In fact, the pinnacle of level 5 leadership is about creating a better next generation. They are those who have the character of responsibility, humility, developing discipline, and being passionate. (Viiindo, 2022). *Social leadership* involves the ability to lead and influence others in a social context.

*Critical thinking is the ability to rate some information and make logical judgments impartially. This is widely acknowledged as a crucial talent in contemporary education and the professional environment. Also, critical thinking refers to actively and systematically analysing and evaluating information to obtain an accurate and trustworthy understanding of the world. Another approach to characterize it is rational, contemplative, accountable, and proficient cognition, concentrating on determining what to believe or do. Moreover, critical thinking is a skill that can help people survive in this huge information era.* (Nurfazri & Irwansyah, 2024).

**Critical thinking** or critical thinking is the ability to evaluate information objectively, analyze data in depth, and make rational decisions based on evidence and logical reasoning.

Communication Science is a dynamic knowledge and is able to adapt in various conditions. The role of Communication Science is quite large in the technological era, especially in information production in the midst of digital transformation. (Meigitaria Santa, 2024) Effective communication allows a person to establish good relationships, build trust, and create productive collaborations. Here are some effects if we can apply *critical thinking, social leadership* and good communication, including: **mBuild strong relationships; push collaboration; solve problems with more efficient; Increase Motivation and commitment; adaptation in a changing environment; Better decision-making; and mhelp in the development of themselves and others.**

*Critical thinking, social leadership* and communication are very important because all three have a great impact on various aspects of life, both personal and professional. **To form these three, it is necessary to have the skill of practicing the Magnet of Fortune to lower the Line of Truth.**

What is a Fortune Magnet? Each other and connected. What is a Fortune Magnet? Just sitting still and sustenance comes, let alone doing something, this is because it is based on the belief that Allah will give miracles to those who believe, namely those who seek to gain Allah's pleasure. (Nasrullah, 2020).

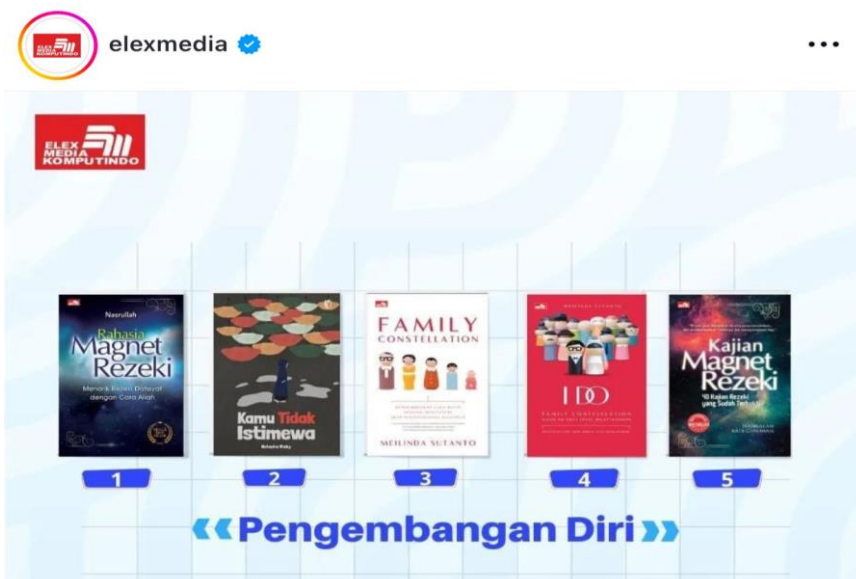

Remember that we are creatures who are interconnected with each other, therefore any action we do, whether positive or non-positive, will also have an impact on other people, the environment and the universe. That is the foundation of the Magnet of Sustenance, all the creatures that Allah created in this world have miracles. Just as the Prophets were given miracles in the form of miracles, then for ordinary human figures not Prophets, but near the prophetic environment Allah gave miracles in the form of Karomah (The Story of Siti Maryam = Who without doing anything Allah gives sustenance in the form of food in paradise (see: QS Al-Baqoroh (3):37) and Ashif bin Barkiya, who can move the throne of Queen Balqis in the blink of an eye. See: QS: An-Naml (27): 38-40). As for us ordinary humans, Allah gives it in the form of Maunnah.(ESQ, n.d.)

**Figure 2. The Secret Book of Magnet of Fortune is the Most Wanted Book on Gramedia**

This phenomenon has attracted widespread attention, especially among people who are looking for ways to improve their well-being and sustenance in their lives. The Magnet of Sustenance program is designed to help individuals overcome obstacles in achieving the blessings of sustenance by strengthening spiritual beliefs and the application of certain techniques that are expected to attract more and abundant sustenance. (Abdullah, 2018)

**Figure 3: The book The Secret of Magnet of Fortune always ranks 1st in the Gramedia Bookstore**

Ustadz Nasrullah himself has won various awards, including the MURI (Indonesian World Record Museum) record consecutively for motivational and spiritual training attended by the most participants. This record shows the high interest and enthusiasm of the community in the approach offered by Magnet Rezeki.

**Figure 4: The Secret Book of Magnet of Fortune gets a MURI record**

Some Achievements of Ustadz Nasrullah with the Magnet of Sustenance: Training with the Most Participants: Ustadz Nasrullah has broken the MURI record several times for training with the highest number of participants, which shows high trust and interest from the community. Structured Methods: The techniques taught, such as the line of truth, are designed to be easy to understand and apply by participants from a variety of backgrounds. Religious

Integration and Self-Development: This program offers guidance for improving financial and spiritual life simultaneously, providing a balance between worldly achievement and inner happiness. (Telegram, n.d.)

Figure 5: The Concept of Sustenance in the Qur'an

Joining the Magnet Rezeki community has many benefits that can be felt by its members. Here are some of the reasons why it is important to join this community: **Continuous Learning:** Members of the Magnet Rezeki community are constantly provided with learning and updates on the latest moves that can help them in their daily lives. This includes a deeper understanding of how the integrity of religion and science can support each other in attracting sustenance. **Support and Motivation:** The community provides a positive and supportive environment, where its members support each other on their journey to improve their livelihood. By interacting with people who share similar goals, community members gain additional motivation and inspiration from each other's experiences. **Practical Guide:** The Magnet of Fortune program provides practical and applicable guidance, which is not just theoretical. Each move and concept taught is equipped with specific steps that can be directly applied in daily life. **Improving Spiritual and Financial Quality:** This program not only focuses on the financial aspect alone, but also emphasizes the importance of maintaining spiritual quality. By participating in the community, members are taught how to live a balanced life, which pays attention to the spiritual aspect while pursuing material success. **Access to Mentors and Resources:** Ustadz Nasrullah and his team provide face-to-face mentoring, both in the form of seminars, workshops, and online sessions. This allows members to get first-hand guidance from people who are experienced in this field. **Recognition and Award:** Ustadz Nasrullah's success in achieving the MURI record is clear evidence that the method applied is effective and widely recognized. This gives members more confidence that they are on the right track. **Increase Networking:** Joining the Magnet Rezeki community also opens up opportunities for its members to expand their network, either in terms of business, work, or other collaborations that have the potential to increase sustenance. **Increased Positive Mindset:** One of the important aspects of Fortune Magnet is forming a positive mindset that focuses on opportunities, not obstacles. This is an important step on the journey to a more prosperous and blessed life.

Figure 6: Magnet Rezeki Online Camp which is held every last 10 days of Ramadan

Figure 7: Youth Miracle Camp for Teens

With these benefits, joining the Magnet Rezeki community is not only about learning about how to attract sustenance, but also about how to develop yourself holistically based on religious values and the application of science. This makes the Magnet Rezeki community a relevant choice for those who want to improve their overall quality of life.

**Figure 8. Submission of ISO 9001:2015 on Quality Management System to, one of the subsidiaries of Magnet Rezeki PT DinarKR Indonesia**

To practice the integration of religion and science, the Magnet Rezeki Community routinely conducts improvement evaluations in the form of monthly and annual meetings. The annual routine meeting is the National Coaching Clinic 4.0 chaired by YMR Arief BAR: Many Extraordinary New Things This Year. Bogor, September 8, 2024. The event, which was held at Chevilly Resort & Camp, became a gathering place as well as a place for CTMRs to learn, practice, and hone their skills to further increase in their capacity as reliable trainers and counselors. With the theme "Together, Level Up, Faster," NCC 4.0 aims to strengthen the capabilities of trainers so that they are able to contribute more widely to society. (A. Fatony Aziz, 2024)

**The Concept of the Magnet of Sustenance and the Wisdom Line Move:** Magnet Rezeki is a self-development concept pioneered by Ustadz Nasrullah, which combines the teachings of Islam with the principles of motivation and financial management. The foundation of the Line of Truth in the Secret of the Magnet of Sustenance is to admit the mistake of "I am wrong", this was first done by the first man, namely the Prophet Adam, with his prayer: "Robbanaa Dzalamnaa anpusana, wa in lam tagfir lana watarhamna lanakuunanna minal khoosiriin". The Prophet Adam did not blame Satan. So the life essence of the Magnet of Sustenance Practitioners is the solution to life "I'm sorry, I'm wrong, you're right", while the problem of life: "I'm right, you're wrong". (ESQ, n.d.) **Integration of Religion and Science:** The theory that supports the synergy between the principles of religion and science in the Magnet of Fortune is the Quantum World Move, which has the laws of energy, vibration, or the principle of resonance in physics. Everything in this nature is interconnected, united, with the same frequency, and interconnected. The frequencies that are often radiated will come back to us. Both positive and non-positive energies. Be careful with our thoughts, our feelings and our motivations, our words and our attitudes. We are in 1 system, when we speak well, then the good comes. Happens the other way around. There is an impact, from the invisible. Pay attention to the invisible, then we will get a miracle of miracles from Allah SWT. (ESQ, n.d.)

This theory includes human personality according to Sigmund Freud which divides human personality based on consciousness, subconscious, and preconscious. (UGM, n.d.). Sigmund Freud also divided personality into Id, Ego, and Superego. (Infographic: Sigmund Freud, 2021)

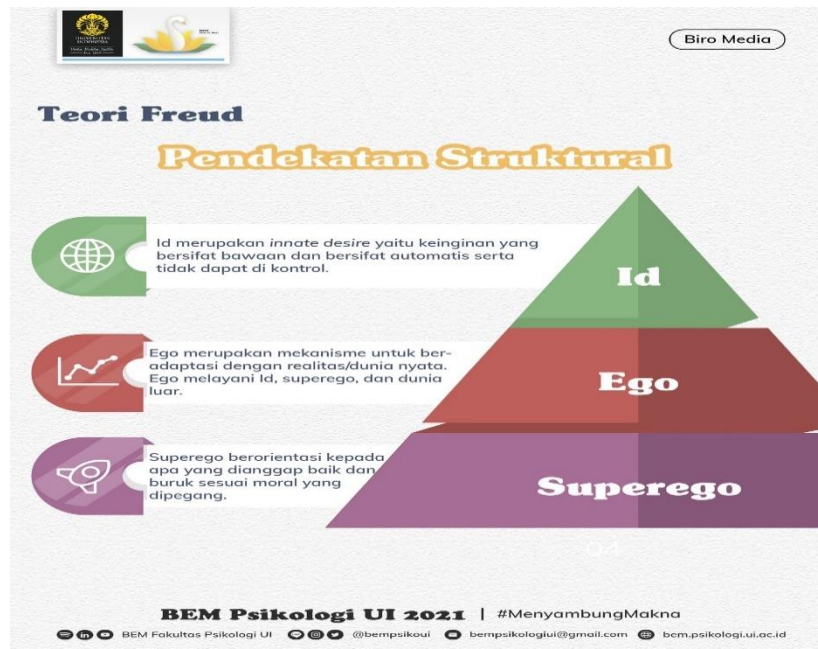

Figure 9: Human personality according to Sigmund Freud

## Research Results

WARREN BENNIS, *THE LEGENDARY organization expert and pioneer of modern leadership principles, famously said, "Leadership is the capacity to translate a vision into reality."* Taking this statement a bit further, we can characterize leadership as the quality that inspires people to do their best every day. (Weinfurter, 2013)

In an increasingly complex world, the skill of lowering the personal ego or "line of truth" is a very important skill and is intertwined with the ability to think critically and lead effectively (*social leadership and communication*). These three elements work together to form a leader who is able to make good decisions, influence others positively, and build healthy relationships. All three play a crucial role in the success of individuals and groups. both in social life, work, and community.

In the science of MagnetRezeki, a leader is one who is able to convey a vision by improving projections or called *the Law of Projection*. The following is *the Law of Projection* in the science of MagnetRezeki. Sorry, the material cannot be attached because it is taken from the training material which is special for the training participants. The author can only provide the grid as follows:

- The secret of wealth is to master the power of the mind.
- Our intellect thinks 60.000 minds every day
- Some thoughts are POSITIVE and not POSITIVE
- Every thought is a prayer
- All prayers are answered by Allah, both positive and negative: *Ud'uuni astajib lakum*
- We have no other choice over our minds, except to think WELL

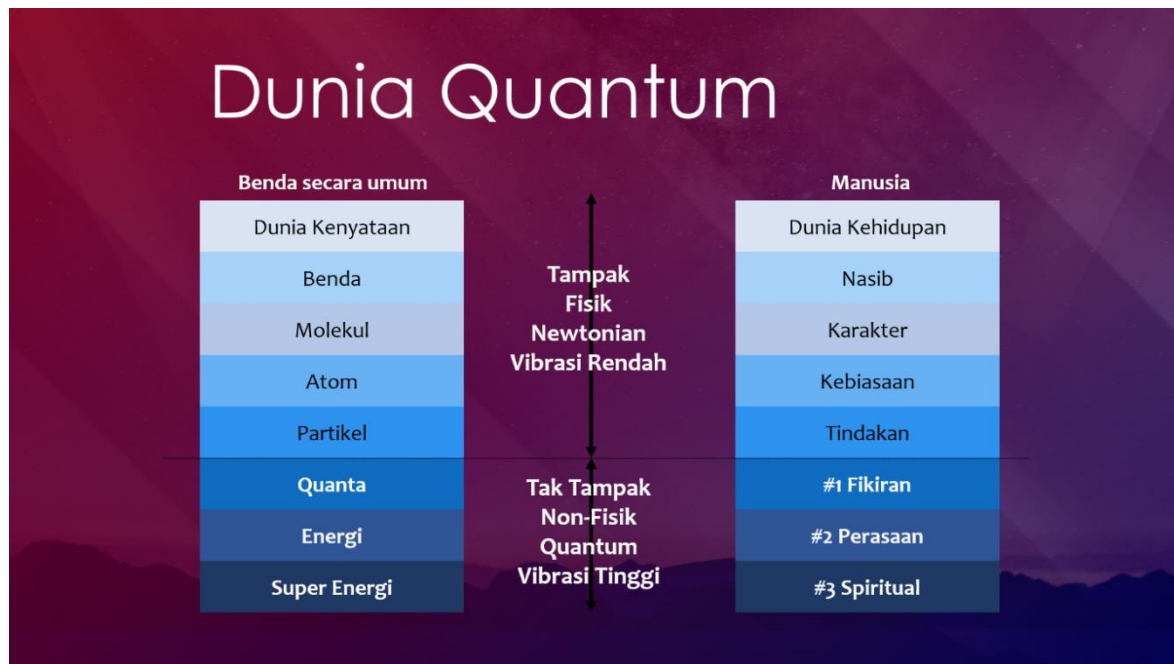

- Every thought is an energy that **radiates** and **vibrates** into nature to become **fate**
- Improving projection or called the *Law of Projection* is by entering the quantum world starting from mastering *the power of the mind*, then *the power of feelings*, then *the power of spiritual power*

Figure 10. Law of Projection or called *Law of Projection*

**Lowering the Line of Truth (Ego): Becoming a Humble and Open Leader.** The ego, or the line of truth in this context, refers to the belief that we are always right and tend to defend our opinions without listening to or considering other points of view. A large ego can hinder critical thinking skills and also hinder leaders from building good relationships with others. Lowering the ego is an important step in developing more effective leadership. Lowering the Line of Truth in the Secret of the Magnet of Sustenance is to admit the mistake of "I am wrong", this was first done by the first man, namely the Prophet Adam, with his prayer: "Robbanaa Dzalamnaa anfusana, wa in lam tagfir lana watarhamna lanakuunanna minal khoosiriin". The Prophet Adam did not blame Satan. So the principle of life of the Practitioners of the Magnet of Sustenance begins when they say: "I am right, you are wrong" and the solution of life is "Sorry, I am wrong, you are right"(ESQ, n.d.)

**In humans, there is a powerful Quantum energy that can change the world.** When it comes to love, does anyone see love? That's one of the invisible zones, that's the quantum zone. Similar to electricity or our cell phone signal, can anyone see it? It is invisible but has a great impact. So if we use the quantum power that exists within us, the power that arises will be powerful, beyond anything on earth.

**Figure 11. In humans, there is a powerful Quantum energy that can change the real world, seminar materials and MagnetRezeki training**

According to Prof. Agus Purwanto in his oration, Physics consists of materials, nuclear and particles. In every field of physics there are two approaches, namely experiment and theory. Because particles require laboratories on a gigantic scale, many universities of particle physics and technology concentrate on theoretical approaches. Quantum theory is a modern physics that began in the XX Century, using probability. (Semesta, 2020).

The following is lowering the line of truth in the science of MagnetsSustenance. Sorry, the material cannot be attached because it is taken from the training material which is special for the training participants. The author can only provide the grid as follows:

- Entering the quantum world starts from mastering the power of the mind, then the power of feelings, then the power of spirituality. Every thought is an energy that radiates and vibrates into nature into fate. Why should we practice admitting WRONG? Because outside of us is the SCENARIO of Allah which is definitely true and inside we are mixed with LUST.
- This is the essence of Istighfar: I am wrong, forgive me, I am ready to learn
- Let's practice like the Prophet If you don't want to do it, it's okay, because there is the noblest human being who wants to do it, namely the Prophet Muhammad (saw). He said istighfar 70-100 times in one day. Why did he admit to being wrong? Even though he is guaranteed ma'sum (awakened from mistakes)? Because of the nature of man, he is not ALLAH, Al-Haqq who possesses the TRUTH. While we? Often claiming to be true to ourselves, this is one of our shields of sustenance.
- The history of the Science of the Line of Truth is from the creation of Adam AS. Satan was asked to bow down to Adam, but he didn't want to, so Satan was cast out of heaven. After hundreds of years, Satan asked God to gain followers by tempting the prophet Adam, which was finally allowed. Adam and Eve were tempted, and they ate the fruit of khuldi. When

he came down to earth, the Prophet Adam did not blame Satan, but instead blamed himself and prayed "Robbana dzolamna anfusana..."

- After that, the descendants of the Prophet Adam AS were divided into 2 (two). Those who follow Adam have the characteristics of always admitting mistakes, staying in heaven (get facilities and miracles) even though he is physically in the world. Those who follow Satan have the following characteristics: always confessing to be right, kept away from heaven (full of problems, always hot heart, and unable to miracle). Satan's followers always have a way of claiming to be right.
- The Prophets had their own style of istighfar<sup>2</sup>.

**Relationship with *Critical thinking*:** A high ego often makes it difficult for a person to think critically because they are reluctant to accept criticism or input from others. Lowering the ego allows a leader to be more open to different ideas and perspectives. This allows for a more objective evaluation of situations and decisions. ***Critical thinking is the Basis for Quality Leadership.*** With *critical thinking* Leaders are able to evaluate information objectively, analyze data in depth, and make rational decisions based on evidence and logical reasoning (Nurfazri & Irwansyah, 2024). In leadership, *critical thinking* It is very important because leaders are faced with complex situations and need the right solutions. One of the quotes about leadership influenced by *critical thinking* be: *Leaders don't create followers, they create more leaders.* -Tom Peters (Michael Denisof, 2024). Some aspects *critical thinking* Relevant to leadership includes: **Ability to Analyze Situations:** Critical leaders are able to see different points of view in dealing with problems and are not stuck in just one way of thinking. They consider alternative solutions and long-term impacts. **Avoiding Bias:** Critical thinking helps leaders to avoid personal biases or erroneous assumptions. This is very important to ensure that the decisions taken are the most rational and fair. **The Courage to Make Evidence-Based Decisions:** Leaders who are able to think critically rely not only on intuition or feelings, but also on using relevant data and evidence in decision-making. *Great leaders don't tell you what to do they show you how it's done* (IDN Times, 2024).

The way to Lower the Line of Truth is to apply *critical thinking* to oneself. Ask Allah to be safe from the snares of satanic lust by observing the following control steps: Realizing that lust is a fence that holds the jaganam, whoever is dragged into lust is dragged into hell. The Prophet said, "Paradise is surrounded by unpleasant things and Hell is surrounded by some orgasms"; To indulge lust is to corrupt the mind and mind and it is to betray Allah in the use of reason; Realizing that resisting lust will produce the strength of the human body, heart, and tongue; Realizing that there is no day that passes but lust and will struggle with each other in the person concerned; Realizing that he was created not for the sake of lust, but for great things that could not be achieved except by opposing him; Having a strong desire to fight his lust so that he becomes very jealous of himself if he commits disobedience; involves the heart in considering the consequences of lust so that it can know how much it passes obedience and how much it brings humiliation; Thinking of what his soul demands, then speaking to his intellect and religion which will later tell him that what is demanded is meaningless; humiliating oneself when one submits to lust, for one does not obey one's lust but will surely be humiliated by oneself; Pride can subdue and conquer the air of its enemies.(Abuss Alhalimi, 2020)

**The relationship between lowering the Line of Truth and Social Leadership and Communication:** Leaders who are able to lower their ego are more likely to gain trust and support from their team. They are more open to feedback, more willing to learn from mistakes, and more willing to share appreciation with others. This creates inclusive and collaborative

leadership, where every team member feels valued and heard. *Social Leadership and Communication* By lowering the Line of Truth, it will be able to form leaders who inspire, motivate, and direct others towards a common goal. By applying the technique of Lowering the Line of Truth, we always say that other people and everything that happens outside our bodies is God's destiny which is definitely right. The only thing that is not true is ourselves because there are still lusts that we are not necessarily able to control. We need to improve ourselves from the smallest and most powerful thing, which is the quantum world. Starting from improving the mind, improving feelings, improving spiritual motivation. So it is hoped that leaders who are ready to collaborate towards better conditions will be built. According to Ignatius Jonan, *True leaders always practice three R's: Respect for self, Respect for others, Responsibility for all their actions.*(IDN Times, 2024) .

Here, the practice of lowering the Line of Truth will build *critical thinking* and it is an important foundation for a leader to make the right decisions and solve problems effectively. Good leaders rely not only on formal authority, but also on the ability to think sharply and strategically. In this context, Critical leaders are those who are able to make decisions that are based on careful judgment and are able to consider risks and opportunities from various perspectives, can help their team to be more reflective and analytical. They create a culture where everyone is invited to think more deeply and solve problems together. Leaders who prioritize the practice of lowering the Line of Truth are also more flexible and adaptive. They are able to adapt to environmental changes quickly and are not stuck in a rigid one-way approach. Developing leadership skills starts from *self awareness* and *know yourself, Growth mindset*. To be a good leader, you must have an empowering mindset, build up, give opportunities. Criticism + pressure = Grow. (Greatmind, 2022)

The three elements (Lowering the Line of Truth, *critical thinking, leadership*) influence each other in a dynamic and profound way. **Inclusive Leadership Starts from Leaders who are Humble (willing to lower the line of truth) and critical thinking**, that is, Leaders who are able to lower the ego and combine it with critical thinking to create an environment where everyone is valued for their contributions. By lowering the line of truth or ego, a leader can more easily accept views and criticisms that may be better than his own. This is crucial to ensure that decisions are made based on objective evaluations, not just out of a desire to defend a personal opinion. Leaders who are humble and willing to lower the line of truth create an environment that encourages others to think critically. Teams led in this way tend to be more innovative and able to tackle challenges in a more creative way. Strong leaders are able to apply *critical thinking* to navigate complex situations, make strategic decisions, and solve problems in innovative ways. This kind of leadership encourages stronger communication and collaboration and makes the team more solid.

The author also conducted quantitative research on the influence of the practice of sustenance magnetism-lowering the Truth Line on abundant sustenance as a form of integration of religion and science. The average score of respondents on understanding the concept of the magnet of sustenance through lowering the Line of Truth was 4.25, indicating a high level of understanding. The average satisfaction score of respondents in the practice of lowering the Line of Truth is 4.32, indicating a high level of satisfaction and good acceptance but there is still room for improvement, especially in terms of technology accessibility. There is a significant positive correlation between the practice of the line of truth, the increase in understanding of science and religion on the results of the miracle of sustenance. Respondents who actively practiced the Magnet of Fortune technique to lower the line of Truth showed an

increase in religious understanding and the application of values in daily life. The miracles obtained in a row from the highest ratings are in terms of Peace of Mind, Health, Business Relations, Finance, Job and Business Opportunities, and others such as righteous, intelligent and successful children. (see attachment)

### Conclusions and Suggestions

*Social leadership* with good communication starts from a leader who is humble (willing to lower the line of truth) and thinks critically. This allows a leader to make thoughtful, data-driven decisions, remain open to other viewpoints and avoid personal bias. Leaders who are able to think critically and lower the Line of Truth, who are not fixated on ego or the desire to always be right, will be more respected and effective in directing a team or organization to success. This creates adaptive, collaborative, and more solution-oriented leadership so that good communication is built in all conditions. It starts with improving the quantum world.

The author's suggestion is: Increase the practice of Magnet Moves Fortune to Lower the Line of Truth. Lower the Line of Truth to a minimum; Continue to improve the Quantum World, increase leadership capacity, "No problem can be solved from the same level of consciousness that created it" Albert Einstein; follow the science of Magnet Rezeki to lower the Line of Truth as a whole in Magnet Rezeki seminars and trainings in order to build a better person and organization in the eyes of Allah and humans towards a Magical Indonesia.
